Color Hex Codes For Web Page Backgrounds And Text

Most colors look different when printed, except where noted, but all these are safe web colors. Use these codes for both background and text colors. Of course, these are only a tiny sample of the available colors. View this list onscreen to choose colors, rather than printing it. Even then, appearance will vary depending on computer, system, and especially monitor.

	ff0000	Scarlet Red
	cc0000	Red
	990000	Dark Red
	660000	Maroon (prints true)
